

BYOD Setup on NTCS-BYOD Wi-Fi (Windows 11)

These instructions contain the steps to configure a BYO device on the NT Christian Schools BYOD network.

1. Join the NTCS-BYOD Wi-Fi network
2. Disable Automatic Proxy settings
3. Install NTSCHOOLS Netskope Certificates
4. Configure proxy settings

Join the NTCS-BYOD Wi-Fi network

1. Join the BYO device to NTCS-BYOD Wi-Fi network using the password provided.

Disable automatic Proxy Settings

1. Press Start menu and type Proxy.
2. From the search results select Proxy Settings in System Settings
3. Ensure that Automatically detect settings is Off

Install NTSCHOOLS Netskope Certificates

1. Open browser (Edge, Chrome etc.) and navigate to <https://cert.education.nt.gov.au>
2. Under the "Certificates" heading find and download both of the following certificates, Netskope Root Certificate and Netskope Intermediate Certificate
3. Open the "Downloads" location on your computer.
4. Open the **NetskopeRootCA.cer** certificate accepting the security warning.
5. On the Certificate window select Install Certificate
6. Set the Store Location to Local Machine and click Next.
7. Select **Place all certificates in the following store** then click Browse and on the pop-up window choose **Trusted Root Certification Authorities**. Click OK then Finish
8. **Repeat the process from steps 3-6** above to install the **NetskopeIntermediateCA.cer** certificate
9. Select **Place all certificates in the following store** then click Browse and on the pop-up window choose **Intermediate Certification Authorities**. Click OK then Finish

Please note the different store locations for the different certificates.

Configure Proxy Settings

1. Press Start menu and type Proxy.
 2. From the search results select Proxy Settings in System Settings
 3. Ensure the following settings;
 - a. Automatically detect settings is Off
 - b. Use setup script is Off
 4. Under Manual Proxy Setup click the Setup button and enter the following
 - a. **Proxy IP address:** proxygre.ntschoools.net
 - b. **Port:** 8080
3. Click **Save** when finished

The Manual Proxy settings in step 4 must be turned ON while the BYOD is connected to the NTCS-BYOD Wi-Fi network. When the device leaves the NTCS-BYOD Wi-Fi network then Manual proxy setup should be turned OFF.

**Your BYOD setup is now complete for use on the
NT Christian Schools BYOD network.**
